OE MANUFACTURED NOx SENSORS

The Leading OEM Alternative

Skyline NOx Sensors: OE Manufactured Sensors at an Aftermarket Price

OE Designed And Manufactured

There are a lot of NOx sensors in the aftermarket today. Skyline's NOx sensors are different than most because they are designed and produced by the same company that supplies the original part to the engine manufacturer. This means you get OE performance at an aftermarket price.

NOx sensors are complicated devices: high-tech proprietary hardware is coupled with specialized software designed by each of the engine manufacturers. Even the smallest deviations from the OE hardware and software can result in fault codes and poor durability.

That's why Skyline recommends that you choose our OE manufactured sensors. Since Skyline's sensors are produced by the suppliers to the OEs, the sensor hardware and software was designed in collaboration with the OEs, the sensors are built to their specifications, and they have gone through rigorous OE-level testing.

Benefits of Skyline OE Manufactured NOx Sensors

- Designed and manufactured by the OE's supplier to the OE's specifications
- Always all new
- No core charges
- Approved for sale and use in California
- Made in the U.S.A.
- 1 year warranty

High Performance Diesel Emission Products

AFTERMARKET NOx SENSORS

The Leading OEM Alternative

Skyline Aftermarket NOx Sensors: OEM Quality Sensors

Why Choose Skyline Aftermarket NOx Sensors

Skyline Aftermarket NOx sensors offer OE quality at an aftermarket price. In side-by-side tests against OEM and other aftermarket sensors, these sensors perform as well or better than OEM sensors and better than most other aftermarket sensors.

In addition, Skyline's aftermarket NOx sensors exceed the OEM design by incorporating increased waterproofing, better resistance to dust, stronger sensing elements, and a faster activation. These sensors have passed extensive durability and stress testing to provide our customers with a robust product.

Skyline's rigorous development and testing process ensures that the software will be compatible with your engine so you don't get fault codes or other performance issues.

Benefits of Skyline Aftermarket NOx Sensors

- Always all new
- No core charges
- Robust hardware
- Compatible software
- A large stock for fast delivery
- 1 year warranty
